3Rs Networks

Environment and Natural Resource

The end is to contribute to the sustainability and competitiveness of agriculture and forestry through the conservation and sustainable use of natural resources, improving environmental quality and the living conditions of rural communities.

Objective

Reduce the negative impacts of agriculture and forestry in the degradation of natural resources and the environment, through the development, promotion and implementation of innovative projects and initiatives that serve as models for the sustainable management of these resources.

Environment and Natural Resource

Capacity Building for Fitosanitary Management in 7 Clusters - USAID/RED

Pilot Project for the Establishment and Strengthening of Forestry Governance - FAO/ACP-FLEGT
